

Introduction

PCC-8 Color Magic is a dual-function DMX and RGB stand-alone controller capable of performing addressable DMX control, stand-alone color chasing effects, speed controllable color changing effects and static colors. It can deliver about 180 watt of power to RGB strips/lamps.

Features

1. 3 sets of RGB outputs (9 channels) for DMX addressing or stand alone effects.
2. DMX Mode: 512 DMX addressing for single or 3 RGB outputs.
3. Color Chasing Mode: Preprogram color chasing effects with speed control.
4. Color Changing Mode: Preprogram color changing effects with speed control.
5. Static Color Mode: Ability to set to any desired color.
6. Customizable color program allowable.

Applications

- Wall Washing
- Architectural Lighting
- Special Effect Lighting

Product Specification

No.	Parameter	Value
1.	Input Voltage	24v DC (customizable)
2.	Power Output	Up to 180 w
3.	Dimension	130mm x 100mm x 30mm
4.	Output Voltage	24v DC
5.	Housing Material	ABS
6.	Color Mode	Standard and customizable

RGB Strips/Lamps

1. PSC-5 RGB Light Strip (3w) – Connect up to 60 strips
2. PRC-31850 RGB Flood Lamp (9w) – Connect up to 3 reels
3. Colour Control for High Power LED RGB Lamps: PDC-3i, PIC-3i, PIC-4i, PFC-3i & PFC-4i
