

Features & Applications

PCV-1 DriveTroller™ is an external constant current driver for High Power LED Lamps with dimming capability. It is designed our MR Tripod RGB but can also be used to power RGB or Mono lamps and be integrated with Prime Light's Dimtroller™ or PCC series RGB Controlerlrs. It comes with 3 outputs with each output capable of powering 6 High Power LED in series.

Dimensions

All dimensions in mm

Product Specifications

Input Power	24 VDC, 25W
Output Capacity	Constant Current 350mA @ 24vdc max per Output Total Max Output: 22W
No. of Outputs	3
No. of LED per Output	6 High Power LED in series
Maximum Vf	24vdc
Housing Material	ABS

Connection
